Objective

Motivated Computer Science undergraduate with hands-on experience in full-stack web development and a strong foundation in problem-solving. Eager to contribute to innovative tech projects while continuously growing my skills in software engineering and modern web technologies.

Education

Bachelor of Technology – Computer Science & Engineering

2023 – 2027

N.M.A.M. Institute of Technology

CGPA: 8.10 (Up to 5th Semester)

Pre-University (PCMB)

2021 – 2023

BSRNSV PU College

Percentage: 84.5%

Experience

Research & Field Survey – Organic Farming

2024

Field Research | Agriculture & Sustainability

- Conducted on-ground field visits to organic farms to study sustainable agricultural practices and crop management methods.
- Interviewed and surveyed local farmers to understand traditional and modern organic farming techniques, pest control, and soil management.
- Analyzed findings to identify patterns in yield improvement, cost reduction, and environmental impact of organic over conventional farming.
- Compiled research observations into a structured report highlighting key benefits of organic methods for small-scale farmers.

Projects

Real-Time Chat Application

2025

- Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), Socket.io, JWT*
- Built a full-stack real-time messaging application using the MERN stack with WebSocket communication powered by Socket.io.
- Implemented features including one-to-one messaging, online/offline status indicators, typing indicators, and message timestamps.

College Event Management System

Sept 2025

- Tech Stack: Java, Spring Boot, HTML, CSS, MySQL*
- Developed a web application to manage college events including registration, scheduling, and participant tracking.
- Implemented CRUD operations, user authentication, and database integration using Spring Boot and MySQL.

CineREC – DBMS Project

Jan 2025

- Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap*
- Designed a dynamic movie information platform with a secure admin panel for content management.
- Optimized database queries for efficient retrieval of film data and user interactions.

Technical Skills

Languages : C, C++, Java

Web Development : HTML5, CSS3, JavaScript, React.js, Bootstrap

Backend & Frameworks : Node.js, Express.js, Spring Boot, PHP

Databases : MongoDB, MySQL

Tools & Platforms : VS Code, GitHub, XAMPP/WAMP, Windows, Linux

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional | Oracle

2025

Full Stack Development | Udemy

2024
